
About our Clinic:

Who:

- Children up to 19 years of age are seen with their families.

What:

- Clinic staff regularly keep in touch with your doctor about your child's progress.
- Follow up with public health nurses to help with preschool, day care or school needs.

Where:

Burnaby Hospital
3935 Kincaid Street
Burnaby, B.C.

(604) 431-2863

When:

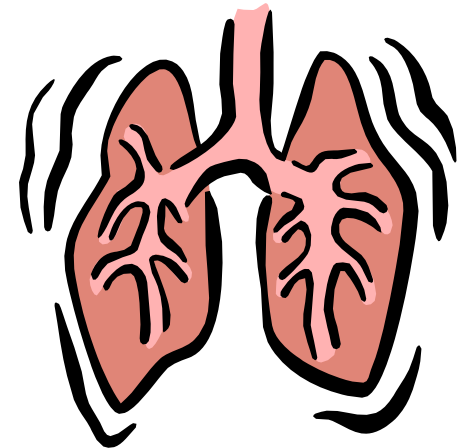

- Booked appointments on Wednesdays and Thursdays.

Did you know that.....

- 10-15% of Canadian children have asthma.
- Asthma often runs in families.
- Asthma can be life threatening.
- Asthma is one of the leading causes that children in our health region are admitted to hospital.

Does Your Child Have Asthma?

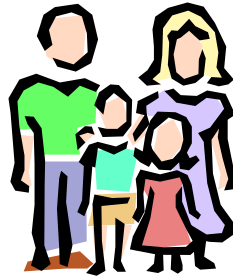

Our Team at the
Burnaby Pediatric Asthma Clinic
can help you manage your
child's asthma

-
- Has your child had trouble breathing or wheezing?
 - Does your child get colds frequently?

- Does it take a long time for them to stop coughing after the cold is finished?
- Does your child frequently cough at night or with exercise?
- Does your child miss school or other activities because of their asthma?
- Has your child been to the Emergency Department several times with difficulty breathing?

If you answered yes to any of the above questions, your child's asthma may not be well controlled.

Come and meet our team at the clinic and you will learn:

- about asthma
 - about early warning signs
 - to identify triggers and how to avoid them
 - more about medications and how to take them
 - about an Action Plan to better control your child's asthma
 - about helpful community resources
-

Our team includes a nurse, pediatrician and a respiratory therapist, who specialize in the care of children with asthma.
