# GetCheckedOnline.com

## What is it?

GetCheckedOnline is an online testing service for sexually transmitted infections (STIs) and HIV. You can get tested without having to visit a doctor or clinic.

GetCheckedOnline is provided by the BC Centre for Disease Control. It's free, confidential and easy to use.

## Who can use it?

GetCheckedOnline is best used for routine STI testing. If you test regularly for STIs, GetCheckedOnline may be a good option for you.

If you have symptoms of an STI or are worried about a recent sexual contact, you should get tested in person at a clinic or your doctor's office.

## What can I test for?

- ✓ **HIV**
  - ✓ **Syphilis**
  - ✓ **Chlamydia**
  - ✓ **Gonorrhea**
  - ✓ **Hepatitis C**
- GetCheckedOnline offers throat swab, rectal swab and urine tests for chlamydia and gonorrhea, and blood tests for HIV, syphilis and hepatitis C.
- GetCheckedOnline does not test for all sexually transmitted infections. It does not test for hepatitis B, genital warts, trichomoniasis or herpes. Please visit a health care provider in person if you want to test for these infections.

## How does it work?

### 1. Create an account

Visit [GetCheckedOnline.com](https://www.getcheckedonline.com) to create an account using the code on the front of this brochure.

### 2. Create a lab form

Complete an online questionnaire to get your recommended tests and then create a lab form. The lab form can either be printed or presented on your mobile device when giving samples.

### 3. Give samples at a lab

Take your lab form to a participating LifeLabs location (see available locations on the back of this brochure). At the lab, you will give blood and urine samples, and may also be given a kit to collect throat or rectal swabs.

### 4. Get results

When your test results are ready, you will be notified by email and can log into GetCheckedOnline to view your results. All results are kept confidential.
