

for your health

Is your 18 month old vaccinated?

If not, please contact your local Public Health Unit or family physician to make an appointment.

- Surrey–North 604-587-7900
- White Rock 604-542-4000

IS YOUR TODDLER PROTECTED?

Children are protected from a host of diseases when they are immunized on time. If your child is late for their 18 month vaccination then they are at risk of getting a variety of vaccine preventable diseases. People often think these diseases aren't a risk in Canada but they remain a real threat to our children's health.

Sylvia Kruger visits the Abbotsford Health Unit to keep her daughter current on her vaccines. This toddler feels safe in Mom's arms while Public Health Nurse, Paula Jacobs, gives the immunization.
