

## Did You Know...?

While in our care, we will help you to find alternatives to smoking. We will also help relieve any discomfort you might feel from nicotine withdrawal.

This change might be easier if you consider the benefits of being smoke-free.

After stopping smoking:

- ☑ In 8 hours, the carbon monoxide level in your body drops. The oxygen in your blood increases to normal.
- ☑ In 48 hours, your risk of heart attack begins to go down. Your taste and smell begin to improve.
- ☑ In 72 hours, your breathing becomes easier and the amount of air your lungs can take in increases.
- ☑ In 2 weeks to 3 months, your body's blood flow and circulation improves.

## Needing support to quit?

Talk to your doctor, nurse, or pharmacist.

To get support and more information...

**www.quitnow.ca**

Free quit smoking program you can do on your own. Lots of helpful tools and resources

**Call 1-877-455-2233**

A friendly, professional helpline. Talk to a Quit Coach anytime, day or night.

Available in 130 languages. Just say your language in English and wait for an interpreter to come on the phone.

**Text 'QUITNOW' to 654321**

Get supportive messages anytime, anywhere.

## BC Smoking Cessation Program

Ask your pharmacist if you qualify for a 12 week supply of nicotine replacement therapy for **free** each calendar year.

# Live Well Smoke-Free

## Residential Care

**All of our care homes are  
smoke-free, both inside and outside.**

# Live Well Smoke-Free

When our environment is smoke-free, we are helping to protect and improve the health and wellness of those who:

- live here
- visit here
- volunteer here
- work here

Even smoking in outdoor areas can harm the health of others.

Also smoking, both in and around our care home, increases the chances of fires.

“ This is my home.  
Second hand smoke  
affects my ability to  
enjoy it.”

Our **Smoke-Free Policy** does not allow smoking:

- in our buildings
- on our surrounding property

This policy applies to family members, visitors, volunteers, employees, and doctors.

It also means no smoking of electronic cigarettes or cannabis.

To protect the health of our employees and volunteers, we do not allow them to go with any resident who wants to go off our property to smoke.

If you smoke, we will offer you Nicotine Replacement Therapy (NRT) and support to stop smoking:

- when you first move-in
- on a regular basis

If a resident chooses to continue smoking, we will work with them to make a plan for safe smoking, including a specific safe and appropriate location.

A safe smoking plan could include:

- Using safe smoking equipment such as a smoking apron
- Being supervised by family or friends while smoking if you cannot safely smoke on your own

**It's never too late  
to stop smoking.**
