## Who do we treat?

We treat people who are:

- well enough to be “medically stable” and have behavior challenges.
- at risk for losing the ability to remain independent.

Patients may also be on our unit because:

- there is a chance they can hurt themselves and others.
- they are resisiting or not wishing care.

## How do we help?

Our goal is to work with you, your family and significant others to help you become stable enough for you to return home or support you in preparation for longer-term placement.

Your health care team includes:

- Geriatric psychiatrists who specialize in psychiatric care of the elderly
- Hospitalists who specialize in hospital care
- Nurses
- Occupational Therapist (OT)
- Physiotherapist (PT)
- Pharmacist
- Registered Dietician
- Social Worker
- Home Health Liason
- Recreation Therapist

## What kind of support do we do we give?

- Helping you to stay as healthy as possible.
- Supporting you by providing a safe enviornnment.
- Connecting you with community resources.
- Providing recreational activities
- Help with moving from acute care to home or longer-term placement.
